

## Class 1 Week by week

Autumn 2017: Week 10

Class 1 have now started a new Science topic - Everyday Materials. We have been learning to name a range of materials found in school, eg metal, wood, plastic, fabric, glass and rock. You can support this learning by talking about materials in your home.

We have linked this topic to the story of the Three Little Pigs this week and we have been hearing some 'huffing and puffing' in their role play. Outdoors their challenge has been to create a house or den for role play too.

Reception have been learning to name 2d or 3d shapes and to recognise them in the environment. Please look out for cubes, cones, spheres, cylinders, cuboids and pyramids as toys or in real life.

We have practised the first two songs for the Christmas play and the children are starting to sound quite confident. Please encourage them to sing at home - maybe they will be confident enough to let you record them and play it back.

### **Next week**

School photo's will be taken on Monday morning so please make sure you have returned your Request slip if you would like a photograph taking.

We are still doing Football skills outside with James  
- weather permitting - so please check that your  
child has outdoor PE kit with trainers.
