

## Spring 2017 - Week 9

This week we have been learning about reptiles in science and linking our learning to Design Technology as we have been making animals with moving parts. The children have love finding out how to use the hole punch, split pins and treasury tags for this. You will be able to see their work on display in class.

We have been learning how to compare the weight of different things and there has been a lot of exploration with the balance scales, plus learning how to read a scale in kilograms and to order things by weight.

Class 1 have been working hard on their skipping skills in dance. We have been generating some top tips, like lifting knees and getting the rhythm, which has helped others to improve their performance. Perhaps you might like to try this over the weekend!

Thank you to all parents who have already returned their permission slip for the visit to Big Sheep Little Cow Farm. Please could you send in the donation to help cover the cost for this, putting it in an envelope clearly marked with your child's name.

## Next Week

On Monday morning we will be having a special delivery of hen eggs in an incubator which will be ready to hatch. We will then be keeping the chicks in school until the end of term so that we can watch them as they grow and change.

On Wednesday afternoon we are having a visit from a very useful pet – a Guide Dog. We will be finding out about how to care for a dog as well as how they help visually impaired people.
