

Class 1 Week by week

Spring 2018: Week 10

This week we have been finding out about fish - what makes them different to mammals and birds. We have thought about where they live - fresh water or sea water or as a pet. Some children have been looking closely at a trout which Mrs Norris brought in, finding out how it can move the tail to swim and take oxygen from the water through it's gills.

Our three little chicks are growing and changing fast. We can already see their wing feathers growing and they are testing them out. The children have been handling them carefully as they are still so delicate.

Next week:

It is Sports Week and we ask that the children come to school in PE kit or sports clothes all week. Please can you put some spare PE kit in their PE bags so that they have something to change into, if needed.

We have a sprinter, Beth Dobbin coming into talk with the children and lead a circuit session. So practise your moves - Star jumps, Spotty Dogs, Push-ups and Sit-ups!

On Friday we are joining in with Sport Relief and the children can come as their favourite sport star or in kit for their favourite sport.
